

PROFESSIONAL SUMMARY

Python Full-Stack Developer and Technical Instructor skilled in Python, Flask, JavaScript, and React.js with a strong background in architecting scalable, responsive web applications and real-time backend systems. Proven record building production platforms including logistics tracking systems, e-commerce portals, and educational tools. Founder of Diran Hub, with deep commitment to clean code, user-friendly interfaces, and training emerging software engineering talent.

TECHNICAL CAPABILITIES & TOOLING

Frontend:	JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Architecture
Backend & DB:	Python, Flask, RESTful APIs, MySQL, Database Modeling, User Auth & RBAC
Tools & DevOps:	Git, GitHub, Linux / Bash, Postman, Figma, PythonAnywhere, Cloud Deployment
Pedagogy & Soft Skills:	Curriculum Design, Technical Training (30+ learners), Mentorship, Public Speaking

EXPERIENCE & PROFESSIONAL LEADERSHIP

Founder & Product Engineer <i>Diran Hub (Academy, Agency & Playground) · Lagos, Nigeria</i> - Founded and directed an engineering ecosystem spanning technical education cohorts, client digital builds, and sandbox projects. - Delivered full-stack web applications for clients, overseeing architecture from initial scoping through production deployment. - Led interactive training cohorts, mentoring aspiring developers in Python, web foundations, and software engineering practices.	2024 – Present
Lead Technical Instructor <i>MOAT Academy, CodeCamp, ILM Nexus Academy & MS Virtual Academy · Lagos, Nigeria</i> - Delivered hands-on software development bootcamps and workshops to 30+ students across Python, JavaScript, and web technologies. - Engineered real-world project assignments and guided learners from zero programming knowledge to shipping functional applications.	2024 – Present
Full-Stack Web Developer <i>OMAK Logistics · Lagos, Nigeria</i> - Engineered a full-stack logistics web portal enabling clients to create shipments and track parcels in real time. - Built responsive parcel dispatch and rider interfaces, role-based authentication, and live status progress tracking.	April 2025
Web Developer <i>Tectonic Global · Lagos, Nigeria</i> Architected and deployed a multi-page web platform for a surveying firm, engineered with a Python backend and responsive UI.	2025

FEATURED PROJECTS & INNOVATIONS

Tonic Solfa Music Web App <i>(Python, Flask, JavaScript, Music Notation)</i> Music website allowing users to search, add songs, and access tonic solfa notation; increased responsiveness by 30% and user engagement by 25%.
MamaGuard Maternal Health MVP <i>(React, Python, Health Tech)</i> Maternal health system created for the NITHUB Hackathon, securing an 85/100 score from the judging panel.
D5 Rentals Booking Portal <i>(JavaScript, Responsive UI, Event Management)</i> Online equipment reservation platform for tables, canopies, and event rental logistics in Lagos.

EDUCATION & CERTIFICATIONS

Certificate in Software Development — MOAT Academy Intensive full-stack software development curriculum covering Python, JavaScript, databases, and engineering best practices.
Bachelor of Science (B.Sc.) in Economics — University of Lagos (UNILAG) In progress. Analytical systems, statistical data analysis, market dynamics, and quantitative decision making.
